Overview

High-Performance Air Purification

This modern air purifier is engineered for large residential or commercial spaces, offering a powerful Clean Air Delivery Rate (CADR) of 1200m³/h. It features a sophisticated multi-layer filtration system and a UV sterilizer to effectively eliminate dust, pollen, odors, and pathogens. With its sleek minimalist design and quiet DC motor, it provides a professional-grade solution for maintaining optimal indoor air quality.

Auto Mode • Timer • Child Lock • Filter Replacement Reminder • UV Sterilization • PM2.5 Display

Technical Specifications

Product Item NO.	TL2913
PCADR	1200m ³ /h
Power consumption	95W
Filter configuration	Pre filter*3+HEPA*3+Activated Carbon*3
Noise level/max	≤69dB (A)
Motor	DC motor
Applicable room size	140-240m ²
Manual control of fan speed setting	Yes (4 fan speed)
Sensor	Laser sensor
Functions	Auto mode,timer, child lock, filter replace reminder, UV sterilizer
Digital display	YES, PM2.5 display
Product dimension	363*363*900mm
MOQ	1000pcs
USD(FOB NINGBO)	

Comprehensive technical data including CADR, filtration layers, and smart functions.

Maximum Noise Level	69 dB(A)
Motor Type	DC Motor
Sensor Technology	Laser Sensor
Fan Speed Settings	4
