

Home Electrical System Fuse

This home service cut out fuse is designed for reliable overcurrent protection in residential electrical systems. Its robust construction and precise engineering ensure optimal performance and safety.

Product Overview

Reliable Home Service Protection

This home service cut-out fuse is engineered to provide essential safety and security for residential electrical systems. Constructed from durable black bakelite resin, it ensures robust protection against electrical shocks and accidental contact. Designed for versatility, this unit supports both single-phase and SPN configurations, making it a dependable choice for modern power distribution needs.

Technical Specifications

Rated Current Range

15 A

Minimum Current

100 A

Maximum Current

Compatible Conductors

- Aluminium
- Copper

Compliance Standard

BS1361

Configuration

Single Phase (SP), SPN

Terminal Capacity

35 sq. mm

Design & Construction

Safety Features

Inter-locked components • Sealing provision • Shock protection

Body Material

Black bakelite resin

Cabling Support

Loop in and Loop out available
