

Honda Engine Connecting Rod Bearing

High-performance connecting rod bearings designed for Honda engines. These bearings provide exceptional durability and wear resistance, ensuring optimal engine performance and longevity.

Product Overview

High-Performance Connecting Rod Bearings

These connecting rod bearings are engineered for optimal engine performance and longevity. Constructed from premium materials with advanced surface treatments, they offer reduced friction and enhanced load-carrying capacity. Designed to meet or exceed strict industry specifications, these components ensure a precise fit and reliable operation under demanding conditions.

Technical Specifications

Product Number	R451H
Arride Number	EC ED

Logistics

Packing Dimensions	32 x 19.5 x 22.5
Quantity per Package	100
