Product Overview

Professional Performance Sanding Solutions

These high-flexibility hook and loop sanding discs are engineered using specialized high-temperature calcined, semi-brittle, and ceramic corundum for superior durability. Designed to replace traditional sheet-type water sandpaper, they significantly reduce operator work intensity while boosting overall efficiency. Their robust construction and precise hook-and-loop pairing ensure a secure attachment for demanding industrial applications.

Technical Specifications

Abrasive Materials	Calcined Corundum, Semi-brittle Corundum, Ceramic Corundum
Backing Material	High-flexibility latex paper

Industrial Applications

Compatible Industries

- Automotive & Aftermarket
- Aerospace & Aviation
- Communications
- Energy
- High-speed Rail
- Electromechanical
- Instrumentation

Suitable Surfaces

Wood • Metal • Plastic
