

# Horizontal and Vertical Line Laser Level

This laser level projects both horizontal and vertical lines. It is designed for precise leveling and alignment in construction, installation, and various DIY projects.

## Product Overview

### Precision Laser Leveling Tool

This 1V1H self-leveling laser level is designed for high-precision alignment and leveling tasks in professional construction and installation environments. It projects both a vertical and a horizontal line, allowing for accurate layout work across a 10-meter working range. Built for reliability, this compact tool offers a robust solution for ensuring perfect alignment on the job site.

## Technical Specifications

### Performance Metrics

<b>10 m</b> Working Range	<b>1 mm/5m</b> Accuracy	<b>8 hrs</b> Working Time
------------------------------	----------------------------	------------------------------

Laser Specifications	635 nm, Class II
Self-Leveling Range	4 °
Tripod Mount	1/4"

## Power & Environment

Power Supply	2 x AA Batteries
Operating Temperature	-10°C to 50°C

## Features

Key Features	Self-leveling, 1V1H Cross Line, Compact Design
