Horizontal Cable Management Panel

Horizontal cable management panel designed for organizing network cables in server racks. It features slotted openings for easy cable routing and is constructed from durable metal.

Overview

Professional Cable Organization

This horizontal cable management panel is designed to streamline and organize network cabling within standard server racks and cabinets. Constructed from durable metal with a clean black finish, it ensures a tidy and efficient infrastructure. The slotted design allows for easy insertion and routing, helping to reduce cable clutter and improve airflow in high-density environments.
