

Horizontal Cylindrical Storage Tank

This horizontal tank is designed for the secure storage of liquids or gases. It features a cylindrical shape with a rounded end and is supported by metal beams.

Product Overview

Industrial Horizontal Storage Solution

This horizontal cylindrical storage tank is designed for reliable containment of liquids or gases in industrial environments. Featuring a robust, modular construction with reinforced paneling, it is engineered for durability and longevity. The unit is supported by a stable blue metal frame, ensuring secure placement and integration into complex piping networks within manufacturing or storage facilities.

Technical Specifications

Access Points

- Rounded end access port

Orientation	Horizontal
Shape	Cylindrical
Construction	Modular Panels, Riveted/Bolted Joints
Installation Environment	Indoor
Support System	Blue metal beam support frame
