

# Horizontal End-Suction Centrifugal Pump for Water Transfer

This horizontal end-suction centrifugal pump efficiently transfers clean water and similar liquids. It is widely used for water supply and drainage in factories, mines, cities, firefighting, and irrigation.

## ADDITIONAL IMAGES

## Product Overview

### Industrial Fluid Transfer Solution

The NL/NLB/NLG series centrifugal pump is a robust and efficient solution designed for a wide range of industrial applications. Featuring a sturdy construction of cast iron and stainless steel, it ensures durability and resistance to corrosion in demanding environments. Optimized for efficient fluid flow and pressure generation, this pump is ideal for water supply, irrigation, HVAC, and chemical processing.

## Technical Specifications

### Suitable Fluids

- Clean water
- Slightly contaminated fluids

### Materials of Construction

Cast Iron, Stainless Steel

### Pump Type

Horizontal End-Suction Centrifugal Pump

## Performance Features

### Performance Highlights

**491 m<sup>3</sup>/h**

Capacity/Flow Reference

**691 m**

Head/Pressure Reference

## Design & Maintenance

### Design Advantages

- Enclosed impeller design
- Mechanical seal for leak-free operation
- Volute casing optimized for efficiency
- Rigid base frame for vibration reduction

### Maintenance Accessibility

Yes
