Product Overview

High-Efficiency Fire Suppression

The EHF series horizontal end-suction fire pump is engineered for reliability and high performance in critical fire safety applications. Designed in strict accordance with UL 448 safety standards, this pump optimizes hydraulic efficiency to ensure consistent water delivery and energy conservation. Its robust construction makes it an ideal solution for industrial, commercial, and municipal fire protection systems requiring dependable, long-term operation.

Technical Standards

Design Features

- Horizontal end-suction configuration
- Optimized hydraulic pump design
- High efficiency energy conservation
- Industrial-grade durability

Compliance & Safety

UL 448 Certified

Application

Ideal Applications

Commercial Buildings • Industrial Facilities • Municipal Water Supplies
