

Horizontal Firewood Log Splitter

This horizontal log splitter is a robust machine designed for efficiently splitting logs. Its horizontal design allows for easy loading and splitting of wood.

Product Overview

Efficient Horizontal Log Splitting

This horizontal log splitter is a robust machine engineered for reliable wood processing, suitable for both home and professional applications. Its horizontal design facilitates easy log loading and consistent splitting performance. Built with durability in mind, it includes essential safety features to ensure user protection during operation, making it an ideal solution for preparing firewood efficiently.

Performance Metrics

Key Performance Indicators

4 Tons

Splitting Force

52 cm

Max Log Length

Design & Usage

Application Suitability	Home Use, Professional Use
Configuration	Horizontal
