

# Horizontal Metal Band Saw

This horizontal band saw is designed for cutting metal. It features a robust frame, hydraulic clamping system, variable speed control, and coolant system.

## Overview

### High-Performance Horizontal Band Saw

This horizontal metal band saw is engineered for precision and efficiency in industrial metal processing applications. Designed to handle a wide range of metal profiles and solids, it features a robust frame construction ensuring stability during heavy-duty cutting operations. Equipped with a hydraulic clamping system, variable speed control, and an integrated coolant system, this machine delivers consistent, accurate results for professional manufacturing environments.

## Technical Specifications

Model Number	GB4240X60
Cutting Capabilities	Metal Profiles, Solid Metal

## Key Features

### Integrated Systems

- Hydraulic Clamping System
- Variable Speed Control
- Coolant System

### Performance Highlights

#### 1 Heavy-Duty

Robust Frame Construction

#### 1 Accuracy

Precise Cutting Mechanism
