

Horizontal Metal Band Saw

This horizontal band saw machine is designed for cutting metal materials. It features a robust frame, hydraulic clamping system, and variable speed control for precise and efficient cutting operations.

Overview

Precision Metal Cutting Performance

This horizontal band saw is engineered for high-precision cutting of various metal profiles and solid bars. It features a robust frame construction ensuring stability during operation, coupled with a reliable hydraulic clamping system for secure workpiece positioning. With integrated variable speed control, operators can achieve efficient and accurate cuts across diverse industrial applications.

Key Metrics

Model Number	GB4240X70
Cutting Capability	Metal Profiles, Solid Bars

Technical Features

Clamping Mechanism	Hydraulic
Speed Control	Variable
Construction	Robust Frame
