

Horizontal Metal Bandsaw

This horizontal bandsaw is designed for cutting metal. It features a robust frame, adjustable cutting parameters, and a coolant system.

Product Overview

Professional Horizontal Bandsaw

The GB4028X40 horizontal metal bandsaw is engineered for precision and durability in industrial cutting environments. Featuring a robust frame construction and a versatile coolant system, this machine is capable of handling a wide variety of metal profiles and solid materials. With an integrated double-clamping mechanism and an intuitive control panel, it offers both enhanced material stability and ease of operation for demanding workshop tasks.

Technical Specifications

Model Number	GB4028X40
Clamping Type	Double Clamp
Machine Type	Horizontal Metal Bandsaw

Features

Suitable Materials

- Metal Profiles
- Solid Metal Stock

Key Features

Robust Frame, Adjustable Cutting Parameters, Coolant System, Control Panel Operation, Double Clamp
