

# Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for precision and efficiency in industrial metal cutting applications. Its robust frame, adjustable cutting speed, and coolant system ensure extended blade life and optimal performance across various metal profiles and solid materials.

## Product Overview

### Industrial Horizontal Band Saw

This horizontal band saw is engineered for high-precision metal cutting in demanding industrial environments. Designed for efficiency and durability, the machine features a robust frame construction that minimizes vibration during operation. It includes advanced capabilities such as adjustable cutting speeds and an integrated coolant system to ensure extended blade life and consistent performance across various metal profiles and solid materials.

## Technical Specifications

Model Identifier	GB4250
Cutting Capabilities	Metal Profiles, Solid Materials

## Features

### Key Features

- Robust frame construction
- Adjustable cutting speed
- Integrated coolant system

## Performance

### Performance Highlights

**1 High**

Operational Precision

**1 Industrial Grade**

Durability
