

Horizontal Metal Cutting Band Saw

This horizontal band saw machine is designed for cutting metal. It features a robust frame, adjustable cutting angle, and a coolant system.

Overview

Precision Metal Cutting Solution

This horizontal band saw machine is engineered for high-efficiency metal cutting operations. Built with a robust frame and a powerful motor, it ensures stability and durability during heavy-duty tasks. It features an adjustable cutting angle and a precise blade guidance system, making it an ideal choice for processing various metal profiles, pipes, and solid materials with high accuracy.

Technical Specifications

Cutting Capabilities

- Metal profiles
- Pipes
- Solid materials

Model Identifier

GB4035

Features

Key Features

Robust Frame • Adjustable Cutting Angle • Coolant System • Precise Blade Guidance
