

# Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for cutting metal with precision. It features a coolant system, adjustable blade speed, and a robust frame for enhanced stability during various metal cutting applications.

## Overview

### Precision Horizontal Metal Cutting Band Saw

This horizontal band saw is engineered for high-precision metal cutting applications. It features a robust frame design to ensure maximum stability during operation, minimizing vibration for cleaner cuts. Equipped with an integrated coolant system and adjustable blade speed, this machine provides the versatility and reliability required for professional metal fabrication environments.

## Technical Specifications

Model Number	GB4028
Key Features	Coolant System, Adjustable Blade Speed, Robust Frame

## Performance

**Application**  
Metal Cutting • Industrial Fabrication
