

Horizontal Metal Cutting Band Saw

This horizontal band saw machine is designed for metal cutting applications. It features a robust frame, adjustable cutting speed, and a coolant system for efficient and precise cutting.

Overview

Professional Horizontal Metal Cutting Band Saw

This horizontal band saw machine is engineered for high-precision metal cutting applications, making it an essential tool for industrial workshops. Featuring a robust frame and a reliable hydraulic clamping system, it ensures stability and safety while processing various materials. With adjustable cutting speeds and an integrated coolant system, this machine delivers consistent performance and efficiency when cutting steel, aluminum, and various alloys.

Technical Specifications

Model Number	GB4260X80
Compatible Materials	Steel, Aluminum, Alloys

Key Features

Clamping Mechanism	Hydraulic clamping system
Cooling System	Yes
Speed Control	Adjustable cutting speed
