

Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for cutting metal profiles and solids. It features a coolant system, adjustable blade tension, and a vise for securing workpieces.

Overview

Precision Metal Cutting Performance

This horizontal band saw is engineered for high-precision cutting of various metal profiles and solids. Designed for efficiency in metalworking shops and fabrication facilities, it features an integrated coolant system and adjustable blade tension for optimal performance. The robust construction ensures stability and reliability during demanding manufacturing tasks.

Technical Specifications

Model Identifier	GB4028
Machine Type	Horizontal Metal Cutting Band Saw

Key Features

Included Features	Coolant System, Adjustable Blade Tension, Workpiece Vise
-------------------	--

Applications

Suitable Environments

- Metalworking shops
- Fabrication facilities
- Manufacturing environments
