

Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for cutting metal workpieces. It features a robust frame, a cutting blade, and a control panel for operation.

Overview

Industrial Horizontal Metal Cutting Band Saw

This horizontal band saw is engineered for high-precision metal cutting in industrial environments. Featuring a robust frame construction, it provides the stability necessary for consistent and efficient operation. Designed for heavy-duty applications, this machine is an essential tool for workshops and manufacturing facilities requiring reliable workpiece processing.

Technical Specifications

Model Identifier	GB42100
Machine Type	Horizontal Metal Cutting Band Saw

Key Features

Design Highlights

- Robust frame construction
- Integrated control panel
- High-efficiency cutting blade

Application Suitability	Industrial, Metal Cutting, Precision Work
-------------------------	---
