

Horizontal Metal Cutting Band Saw Machine

Horizontal metal cutting band saw machine designed for cutting metal profiles, pipes, and solids. It features a robust frame, adjustable cutting speed, and coolant system.

Overview

High-Performance Metal Cutting

This horizontal metal cutting band saw machine is engineered for precision and efficiency in industrial metalworking environments. It is specifically designed to handle a variety of metal profiles, pipes, and solid materials with ease. Featuring a robust construction and an integrated coolant system, it ensures consistent cutting performance and extended blade life for demanding applications.

Technical Specifications

Core Features

- Robust frame construction
- Adjustable cutting speed
- Integrated coolant system

Model Identifier	GB4028X60
Material Compatibility	Metal Profiles, Pipes, Solid Metals
