

Horizontal Metal Cutting Bandsaw

The horizontal metal cutting bandsaw is a versatile machine for cutting various metal materials with precision and efficiency. It features a robust construction with a heavy-duty frame and a powerful motor for reliable performance.

Product Overview

Professional Horizontal Metal Cutting Solution

This horizontal metal cutting bandsaw is a versatile machine engineered for precision and efficiency across various metal materials. Built with a heavy-duty frame and a powerful motor, it ensures reliable performance in demanding industrial environments. The integrated coolant system and adjustable blade guides work together to extend blade life while maintaining high cutting accuracy for metalworking shops and fabrication facilities.

Key Features

Core Features

- Heavy-duty frame construction
- Integrated coolant system for blade lubrication
- Adjustable blade guides for precision
- Quick-release vise for efficient clamping
- Built-in chip tray for easy maintenance

Compliance & Safety

Certifications

CE

Operation & Control

User Interface

User-friendly manual controls designed for industrial applications

Applications

Target Applications

Metalworking Shops, Fabrication Facilities, Industrial Manufacturing, Maintenance Workshops
