

Horizontal Metal Cutting Bandsaw

This horizontal bandsaw is designed for precision metal cutting. Its rigid steel frame minimizes vibration, while the adjustable vise ensures accurate cuts on various materials.

Overview

Professional Metal Cutting Solution

The BS-215G is a robust horizontal bandsaw engineered for precision metal cutting in workshops and small-scale production environments. It features a rigid steel frame that ensures stability and minimizes vibration, paired with a powerful variable-speed motor for versatile material handling. Integrated safety features and a dedicated coolant system make it a reliable choice for high-efficiency operations.

Performance

Performance Highlights

215 mm

Cutting Capacity

Technical Features

Drive & Speed Control	Powerful motor with variable speed control for optimal cutting performance across various materials.
Coolant System	Yes
Frame Type	Rigid steel frame designed for stability and vibration reduction.

Safety & Operation

Operational Advantages

- Integrated coolant system prolongs blade life
- Variable speeds allow for material-specific optimization
- Secure workpiece holding via adjustable vise
- Reduced vibration for higher cutting accuracy

Safety Equipment	Emergency Stop Button, Blade Guards, Adjustable Vise
------------------	--

Applications

Recommended Use

Workshops • Small-scale Production • Metal Fabrication
