

Horizontal Metal Cutting Bandsaw

This horizontal metal cutting bandsaw is designed for cutting various metal materials with precision. It features a robust frame, powerful motor, and a hydraulic downfeed control for smooth operation.

Product Overview

Versatile Metal Cutting Solution

This horizontal metal cutting bandsaw is a robust machine engineered for precision and efficiency across various metal materials. It features a powerful motor and a hydraulic downfeed control system that ensures smooth, controlled cutting operations. Designed for professional workshops, the machine includes a swivel head for versatile angle cutting and a mobile base for easy repositioning within your facility.

Performance Metrics

Key Performance Indicators

1 System

Hydraulic Downfeed

1 Type

Swivel Head

Cutting Capabilities

Cutting Features

- Angle cutting via swivel head
- Adjustable bearing blade guides
- Precision hydraulic downfeed control
- Quick-release vise clamping

Technical Specifications

Coolant System	Yes
Mobile Base	Yes
Frame Construction	Robust frame with sturdy base

Safety & Maintenance

Maintenance & Safety	Coolant System, Blade Life Extension, Overheating Prevention, Secure Clamping
