

Horizontal Plastic Powder Mixer

This horizontal mixer is designed for efficiently blending plastic raw materials and powders. Its robust construction ensures durability and longevity in demanding industrial environments.

Overview

Horizontal Plastic Powder Mixer

This horizontal mixer is engineered for the efficient blending of plastic raw materials and powders in industrial environments. Featuring a robust stainless steel construction, the unit offers excellent corrosion resistance and ensures easy cleaning for maintenance. With adjustable mixing times and a high-efficiency design, it provides reliable performance and long service life for various plastic processing applications.

Technical Specifications

Mixing Timer Range

30 min

Max Timer Setting

Capacity Range	100kg - 200kg (Optional as per request)
Hopper Incline Angle	100 degrees

Key Features

Safety Mechanisms

- Chain secure device
- Lid interlock system

Operational Advantages

Rust Free • Easy Unloading • High Efficiency • Low Energy Consumption

Construction Material	Stainless Steel Pail, Stainless Steel Paddles
-----------------------	---
