

Horizontal Spindle Surface Grinder

This surface grinder features a horizontal spindle and a reciprocating table. It is designed for precision grinding of flat surfaces and includes a dust extraction system and manual controls.

Product Overview

Precision Horizontal Spindle Surface Grinder

The MYS7125 is a professional-grade horizontal spindle surface grinder engineered for high-precision machining of flat surfaces. Featuring a robust reciprocating table design, it ensures consistent material removal and surface finish quality. This unit comes fully equipped with an integrated dust extraction system to maintain a clean and safe operational environment, making it an ideal choice for workshop and industrial applications.

Technical Specifications

Primary Application

Precision Machining • Surface Finishing
