

Hose and Pipe Quick Connect Coupling

This coupling facilitates rapid connections between hoses and pipes. Its durable metal construction and secure design make it suitable for fluid transfer applications.

Overview

Industrial Quick Connect Coupling

This durable quick-connect coupling is engineered for reliable fluid transfer in demanding environments, including marine and industrial applications. Designed for secure and leak-resistant pipe and hose connections, it features a robust metal construction suitable for ship pipelines. The intuitive design allows for efficient operation, making it an essential component for fluid management systems.

Technical Specifications

Suitable Applications

- Ship pipelines
- Industrial fluid transfer
- Marine applications

Diameter Range	40A to 65A
Material Composition	Bronze, Brass
Core Function	Opening and closing of fluid pipelines
