Product Overview

Professional Hose Connection Solutions

This collection of hose connection fittings is engineered for reliable, leak-proof performance in irrigation and fluid transfer systems. Designed for durability, these components include stainless steel clamps for secure fastening and high-quality, chemical-resistant plastic fittings for various agricultural applications. Whether you are setting up garden irrigation or complex farm water distribution, these accessories provide the essential grip and seal required for demanding environments.

Physical Specifications

Design Features

- Slotted band for adjustable sizing
- Ribbed design for enhanced grip
- Tapered ends for easy insertion
- Screw mechanism for tightening
- Barbed connector for secure attachment

Compatible Hose Size

16 mm

Materials

Stainless Steel, Chemical-Resistant Plastic

Application & Usage

Recommended Applications

Irrigation Systems • Agricultural Machinery • Fluid Transfer • Landscaping • Low-Pressure Water Distribution

Key Performance Metrics

16 mm

Standard Diameter

1 Low

Pressure Rating
