

Hot Air Fryer with Temperature and Timer Control

This air fryer is designed for frying food with hot air instead of oil. It features a temperature control knob ranging from 80 to 200 degrees Celsius and a timer knob for setting cooking durations.

Introduction

Healthy and Efficient Cooking Solution

The HF-2012 Hot Air Fryer utilizes a rapid air circulation system to fry food faster while saving energy. This appliance offers a healthier alternative to traditional frying, reducing fat consumption by up to 80% without sacrificing taste. Designed for ease of use and safety, it features intuitive mechanical controls for both temperature and timing, making it an essential tool for modern kitchens.
