

Hot and Cold Beverage Vending Machine

This automatic vending machine uses advanced semiconductor cooling and rapid heating technology. It is suitable for use in offices, public places, and homes.

Product Overview

Professional Beverage Solution

This advanced automatic vending machine utilizes rapid heating and semiconductor cooling technology to deliver high-quality beverages. Engineered for convenience, it is suitable for diverse environments including offices, homes, and public spaces. The unit features an intelligent user interface, automated dispensing systems, and flexible water supply options to ensure seamless operation.

Technical Specifications

Water Supply Options

- Purified water tank
- City running water
- Optional water pump support

Compliance & Certification

CE • CB • KC • NCC • LFGB • NSF • ETL

Key Features

Automatic cup-dropping, High rotary speed mixing, Microcomputer control, Intelligent coin system
