

Hot and Cold Hydrogen Water Purifier with Reverse Osmosis

This water purifier dispenses both hot and cold water enriched with hydrogen through reverse osmosis. It features a 6L water tank and a 3:1 low wastewater ratio for improved efficiency.

Product Overview

Advanced Hydrogen Water Solution

This high-performance water purifier combines reverse osmosis filtration with advanced hydrogen enrichment technology. Designed for versatility, it provides instant access to hot, warm, and cold purified water suitable for homes, offices, and commercial settings. The system ensures superior water quality while maintaining an efficient 3:1 wastewater ratio for cost-effective operation.

Key Features

Features

- Hydrogen-rich water generation
- Visible hydrogen production
- Rapid 3-second water heating
- Efficient 3:1 wastewater ratio
- Integrated child lock safety
- 6L large capacity water tank

Filtration System

Filtration Tech

Stage
PAC Composite Filter
RO Reverse Osmosis Membrane
CF Filter
Electrolysis Hydrogen Module

Performance Metrics

Efficiency

30 L/h

Purification Flow

18 L/h

Heating Capacity

2000 L

Rated Capacity

Technical Specifications

Power Requirements	220V/50Hz, 2200W Rated Heating Power
Dimensions	475 x 240 x 430 mm
Recommended Use	Home, Office, Commercial
