

Hot-Dip Galvanized Steel Mounting Bracket for Electrical Equipment

This hot-dip galvanized steel bracket is designed for supporting electrical equipment. Featuring pre-drilled holes for easy installation, it provides exceptional corrosion resistance and stability.

Product Overview

Robust Mounting Solution

This hot-dip galvanized steel mounting bracket is engineered for high-performance support in electrical infrastructure. Its T-shaped configuration and heavy-duty construction provide exceptional stability for conduit systems, cable trays, and various electrical components. The hot-dip galvanization process ensures superior corrosion resistance, making it an ideal choice for both indoor and demanding outdoor environmental conditions.

Technical Specifications

Design Features

- T-shaped configuration
- Central vertical support plate
- Curved base plate
- Pre-drilled mounting holes
- Top plate with central aperture

Surface Treatment

Hot-Dip Galvanized

Material

Steel

Key Performance Metrics

Performance Highlights

1 High

Corrosion Resistance

1 Quick/Secure

Installation

Applications

Primary Applications

Electrical Conduits, Cable Trays, Electrical Equipment Support, Outdoor Infrastructure
