

# Hot Pressed Diamond Saw Blade

This hot-pressed diamond blade is designed for cutting various materials. It features durable construction and precision diamond grit for efficient and clean cuts.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Cutting Solution

This hot-pressed diamond saw blade is engineered for exceptional intensity, safety, and longevity. Designed to deliver high cutting speeds with superior continuity, it is an essential tool for professional construction and masonry tasks. Its versatile construction supports both wet and dry cutting applications across a wide range of hard building materials.

## Technical Specifications

### Cutting Method

- Dry cutting
- Wet cutting

### Suitable Materials

Concrete, Hard Brick, Tile, Hard Granite, General Building Materials

## Usage & Compatibility

### Compatible Equipment

- Angle grinders (Mini blades)
- Handheld saws
- Panel saws
- Road cutters

## Performance Features

### Key Performance Metrics
