

Household Electric Steam Iron

This is a household electric steam iron used for pressing clothes. It features a water tank for steam generation and a non-stick soleplate.

Product Overview

Efficient Household Ironing

This household electric steam iron is designed for efficient and convenient garment care. Featuring a user-friendly temperature control dial and a durable non-stick soleplate, it ensures smooth gliding across various fabric types. The integrated water tank allows for consistent steam generation, making it an essential tool for maintaining professional-looking clothes at home.
