Product Overview

Reliable Surge Protection for Household Systems

This modular surge protection device (SPD) is engineered to safeguard household electrical systems from dangerous voltage spikes induced by lightning strikes or grid disturbances. Featuring a user-friendly modular design for straightforward installation and maintenance, it ensures continuous protection for sensitive equipment. The device includes an integrated display for real-time status monitoring and conforms to international safety standards.

Electrical Specifications

Maximum Discharge Current (Imax)

40 kA

Max Discharge Current

Nominal Discharge Current (In)	20 kA
Rated Voltage	385VAC (50/60Hz)
Voltage Protection Level (Up)	1.8kV - 2.0kV

Standards & Compliance

Compliance Standards	IEC61643-1, GB18802.1
----------------------	-----------------------

Features

Key Features

- Modular design for easy installation and replacement
- Integrated LCD display for status monitoring
- Comprehensive protection for L/N, L, and N connections
