

Household Juice Extractor with Stainless Steel Components

This compact juicer is designed for efficient juice extraction in a household setting. Its stainless steel components ensure durability and hygiene.

Product Overview

Efficient Household Juicer

This compact and efficient household juice extractor is designed for durability and hygiene, featuring a stainless steel construction. It includes a transparent feeding chute and pulp container, allowing users to easily monitor the extraction process. The system effectively separates pulp to ensure a smooth, fresh drink, and the unit is engineered for quick assembly, disassembly, and convenient cleaning.
