

Household Kitchen Blender with Additional Blending Container

This household blender features a transparent blending jar with a handle and lid. A smaller, separate blending container with a white base is also included.

Overview

Versatile Kitchen Blending Solution

This household blender is designed for efficient food preparation, featuring a robust 500W long-life motor equipped with an overheat protection system. The unit includes a 1.5L main plastic jar and an additional blending container, making it suitable for various tasks ranging from smoothies to grinding coffee beans. With two speed settings and a pulse function, it offers precise control for consistent results.
