

Household LED Light Bulb

This LED bulb is designed for household use, providing energy-efficient lighting with a long lifespan. The bulb features a standard screw base for easy installation and incorporates heat dissipation fins for optimal performance and longevity.

Overview

Energy-Efficient Household Lighting

This LED bulb is specifically engineered for household use, offering a perfect balance of energy efficiency and long-lasting performance. It features a standard screw base for seamless installation across a wide range of residential fixtures. With integrated heat dissipation fins and a frosted diffuser, it provides reliable operation and soft, even illumination that minimizes glare for a comfortable living environment.

Technical Specifications

Key Features

- Standard screw base
- Heat dissipation fins for longevity
- Frosted diffuser for even light distribution
- Glare reduction technology

Sustainability

Energy-efficient, Environmentally friendly, Low carbon emissions

Primary Application

Household
