

Household Lockstitch Sewing Machine

This household sewing machine is exquisitely manufactured with reasonable construction and superior quality. It is equipped with cam motion take-up lever, oscillating shuttle, and straight lock stitch.

Product Overview

Professional Household Lockstitch Machine

This household sewing machine is expertly engineered with a robust construction suitable for both home use and small garment production. It features a versatile design that accommodates treadle, hand-operated, or electric motor configurations. With its high-precision cam motion take-up lever and oscillating shuttle, it delivers reliable straight lock stitch performance on a variety of fabrics including cotton, ramie, wool, and silk.
