

Household Portable Air Conditioner with Digital Display

This portable air conditioner is designed for household use, providing both cooling and dehumidification. It features a digital display, adjustable settings, and a compact design for easy mobility.

Product Overview

Advanced Climate Control

This portable air conditioner offers a versatile 4-in-1 solution for indoor climate management, featuring heating, cooling, dehumidifying, and air flowing modes. Designed for convenience and health, it incorporates advanced catalysis technology to help degrade hazardous components like formaldehyde while preventing the accumulation of mold and bacteria. The unit is built for easy mobility and user-friendly operation, making it an ideal choice for maintaining comfortable and clean indoor air quality.

Key Features

Maintenance & Hygiene

- No water drainage required
- Self-cleaning fin technology
- TitanGold catalysis for air purification

Operating Modes	Heating, Cooling, Dehumidifying, Flowing
Timer Settings	24-hour timer for auto-start and auto-off

Design & Mobility

Design Features

Digital Display • Portable • Rolling Casters • Integrated Handles
