

Household Sewing Machine for Garments and Shoes

This is a household sewing machine designed for manufacturing garments, shoes, and accessories. It is suitable for various sewing applications and can be paired with optional drawer tables.

Product Overview

Versatile Household Sewing Solutions

This collection of household sewing machines offers robust performance for garment, shoe, and accessory manufacturing. Available in classic designs including the JA2-1 and JA2-2 models, these machines are engineered for reliability and ease of use. The inclusion of a 5-drawer table option provides an organized workspace, ensuring all sewing supplies and accessories remain accessible during operation.
