

Household Space Heater with Radiant Element

This space heater is designed for household use. It utilizes a radiant heating element to provide warmth.

Product Overview

Radiant Heating Solution

This household space heater utilizes advanced radiant heat technology to provide efficient, localized warmth for interior environments. The unit features a distinctive circular heating element encased behind a protective metal grill for safety and durability. Designed for stability, the heater sits on a sturdy yellow base and includes a user-friendly central control knob for intuitive operation.
