

Household Steam Cleaner for Surface Sanitization

This steam cleaner is designed for versatile household cleaning. It uses steam to sanitize surfaces without chemicals.

Product Overview

Professional Household Sanitization

The JJB-208 steam cleaner provides a high-performance solution for household surface sanitization using natural steam technology. With a 4 bar pressure output and a 2000W heating element, it effectively cleans surfaces without the requirement for harsh chemical agents. Designed for reliability and ease of use, this unit is an efficient tool for maintaining a healthy and hygienic home environment.
