

Household Steam Iron with Temperature Control

This steam iron is designed for household use and features a temperature control dial and steam control settings. It incorporates a non-stick soleplate for smooth gliding and includes safety features like overheat protection.

Product Overview

Household Steam Iron Performance

This household steam iron is engineered for efficient garment care, combining precise temperature control with robust steam generation. Featuring a non-stick soleplate and a pointed precision tip, it ensures smooth gliding across various fabric types while reaching tight pleats and difficult corners with ease. Designed with user safety in mind, it includes an integrated overheat protection system and an ergonomic handle for prolonged comfort during ironing tasks.

Key Features

Materials

- Durable Plastic housing
- Metal internal components

Design & Safety

Non-stick Soleplate, Overheat Protection, Ergonomic Handle, Temperature Control Dial

Functional Controls

Operations

- Manual temperature adjustment dial
- Adjustable steam control settings
- Internal water reservoir for steam generation
