

Household Ultrafiltration Water Purification System

This water purification system utilizes a multi-stage filtration process to deliver clean and safe drinking water. Measuring 390*130*395mm, it has a 60L/H capacity.

Overview

Clean Water Solution

This household ultrafiltration water purification system utilizes an advanced multi-stage filtration process to provide safe, high-quality drinking water. Designed for convenience and reliability, the unit is wall-mountable to save valuable kitchen space. The integrated system effectively removes sediment, chlorine, and impurities while enhancing water taste and odor through specialized post-filtration stages.

Filtration Technology

Filtration Stages

- Sediment Filter
- Carbon Filter
- Ultrafiltration (UF) Membrane
- Post-Carbon Filter

Contaminant Removal

Sediment Removal, Chlorine Reduction, Impurities Removal, Odor Neutralization

Installation & Design

Target Use

Household

Mounting Type

Wall-mountable
