

Household Ventilating Fan with Grille

This ventilating fan is designed for household use in air conditioning and ventilation applications. It features a square design with a protective grille and a compact build for easy installation.

Product Overview

Compact Ventilation Solution

This household ventilating fan is engineered to provide efficient air circulation in enclosed spaces such as bathrooms and kitchens. Its square design and integrated protective grille ensure safe operation and a neat aesthetic once installed. By effectively removing stale air, this unit helps maintain a comfortable and healthy environment in residential settings.
