

Household Ventilating Fan

This ventilating fan is designed for household use in air conditioning and ventilation applications. It removes stale air and odors to improve indoor air quality.

Product Overview

Professional Ventilation Solution

The BPT10-14-2E ventilating fan is a high-efficiency solution designed to maintain optimal indoor air quality in residential environments. Engineered for versatility, it effectively eliminates stale air and unwanted odors in high-moisture areas such as bathrooms and kitchens. Its compact housing and sleek square grille ensure both a clean aesthetic and a straightforward installation process.

Technical Details

Key Features

- Compact housing design
- Square grille aesthetics
- Easy installation
- Efficient odor removal

Model Number	BPT10-14-2E
Application	Bathroom, Kitchen, Residential
