

Household Washing and Drying Machine

This washing and drying machine is designed for household use. It features a durable motor with a pulley system for efficient power transmission.

Product Overview

Reliable Home Laundry Solution

This robust washing and drying machine is engineered specifically for household environments, focusing on long-term durability and consistent performance. Featuring a sophisticated motor and pulley power transmission system, it ensures efficient operation for daily laundry needs. The unit is designed with a well-ventilated housing to prevent overheating, while its compact footprint and stable base allow for versatile and secure installation in various home settings.
