

Household Water Filtration System

This household water purifier is designed to dispense clean drinking water. It features a two-tiered container system with a filtration mechanism.

Product Overview

Clean Water Solution

This household water filtration system provides an efficient, gravity-fed solution for purifying civic tap water. Designed with a two-tiered container structure, it utilizes an active carbon cartridge to ensure clean drinking water for home or office environments. The system is built from durable materials and offers flexible capacity options to suit different household needs.

Performance & Filtration

Outflow Rate

323 ml/min

Outflow Flux

Compatible Water Source

Civic tap water

Filtration Technology

Active carbon cartridge
