

HR6 AA NiMH Rechargeable Battery 1.2V 2300mAh

High-capacity nickel-metal hydride (NiMH) rechargeable batteries are designed for various electronic devices. The batteries have a 1.2V voltage and 2300mAh capacity, which provides long-lasting power and reliable performance.

Overview

High-Capacity Rechargeable Power

These HR6 AA Nickel-Metal Hydride (NiMH) batteries are engineered for high-drain electronic devices, offering a reliable 1.2V output and a substantial 2300mAh capacity. Designed for longevity and performance, they provide a cost-effective, environmentally friendly alternative to single-use batteries. With a low self-discharge rate, they maintain power effectively during storage, making them an ideal choice for cameras, remote controls, and portable toys.

Technical Specifications

Voltage	1.2 V
Capacity	2300 mAh
Battery Chemistry	NiMH (Nickel-Metal Hydride)
Size	AA (HR6)

Features

Key Benefits

- Rechargeable for multiple cycles
- High capacity for long-lasting power
- Low self-discharge rate
- Stable voltage output
- Cost-effective and eco-friendly

Compatibility	Digital Cameras, Remote Controls, Toys, Portable Electronics
