

# HSS Counterbore Drill Bit Set

High-speed steel counterbore set conforms to DIN 373 standards and is suitable for M3 to M10 screw sizes. The two-flute design ensures faster, smoother cutting, while the stepped construction allows creation of varying diameter holes with a single bit.

## Product Overview

### High-Performance HSS Counterbore Set

This 6-piece HSS Counterbore Drill Bit Set is designed for professional-grade precision in creating through holes for screw sizes M3 to M10. Manufactured according to the DIN 373 standard, these bits feature spiral flutes ground by CBN to ensure a quiet, smooth cut and high cutting performance. This versatile set is ideal for applications requiring clean, accurate finishes in various materials.

## Technical Specifications

### Standard

DIN 373

### Set Composition

**6 PCS**

Pieces per Set

### Material

High-Speed Steel (HSS)

### Flute Design

Spiral flute ground by CBN

## Capabilities

### Screw Size Range

M3 to M10

### Hole Type

Through Hole, Counterbore

## Key Features

### Performance Benefits

- Quiet cutting operation due to CBN ground flutes
- High cutting performance for efficient drilling
- Precise hole sizing for industrial applications
- Laser-etched sizes for easy identification

## Applications

### Industry Applications

- Electrical
- Plumbing
- HVAC

### Suitable Materials

Sheet Metal, Plastic, Wood
